

ACO Wexel® - Push-fit

Case Study

Pullenvale Market Place, Brisbane, Qld

Pullenvale Market Place is a convenience centre with a wide variety of retail stores serving the local community. The Market Place includes an IGA supermarket, cafes, a medical centre and a gym.

Project Design Brief

Within commercial catering facilities, cleaning is an integral part of the every-day work. Drainage is a necessary element to ensure standing water is removed and not pose a hazard for staff. With wash downs occurring several times per day, designers needed to ensure that wastewater is captured and removed quickly, whilst protecting the underlying pipework from blockage. The drainage grate also had to be durable to cope with cleaning chemicals.

ACO's Solution

- **ACO Wexel** Compact Bucket Trap stainless steel floor drain

Benefits

- The push-fit floor drains are supplied complete with O-rings to provide a quick connection to the pipework
- Hex socket screws are used to fix the stainless steel grate securely into place, whilst enabling access for cleaning
- The fixed and removable strainers in the floor wastes ensure food scraps and debris are prevented from entering the wastewater system

Other ACO products used

- Commercial stainless steel drainage (ACO Stainless)
- Trench drainage systems (ACO Drain®)
- Trafficable cable enclosures (ACO Cablemate®)
- Cover and frame systems (ACO Access)
- Grease traps (ACO Passavant)
