

## ACO Wexel - floor drains

### Case Study

### Totally Workwear Stadium - Brisbane, QLD

Langlands Park, known as Totally Workwear Stadium, is a sporting venue in Coorparoo and home to rugby league teams, Brisbane Tigers (Queensland Cup) and Brisbane Broncos Women's team (NRLW). The stadium recently underwent a \$10 million redevelopment, adding new seating in front of a new double-story building.

#### Project Design Brief

The redevelopment required a drainage system beneath a new suspended slab, connecting the lower-level seating to the first-floor facilities. The system needed to be shallow to fit within the slab depth and capable of handling washdown water. It also had to accommodate regular pedestrian use, ensuring safety and accessibility.

#### ACO's Solution

- [Wexel](#) push-fit Stainless Floor Drain

#### Benefits

- The push-fit floor drains are supplied complete with O-rings to provide a quick connection to the pipework.
- The grade 304 stainless steel cast grate provides long-term durability.
- The hinged grate ensures that the grate cannot be lost when accessed for maintenance.
- Grates are designed to resist the penetration of an 8mm heel and comply with aspects of AS 1428.2 and AS 3996 for wheelchair accessibility.
