

## ACO Wexel – push-fit

### Case Study

#### The Camfield, Perth WA

The Camfield is a microbrewery and pub located on banks of the Swan River on Burswood Peninsula. Located next to Optus Stadium, the Camfield is a popular entertainment space. As Australia's largest pub, it has five bars with 170 beer taps and an on-site microbrewery.

#### Project Design Brief

Drainage is required in the numerous bar areas as designers wanted to ensure standing liquid was not a hazard for bar staff. Designers also wanted the drainage elements to be unobtrusive and suitable for use with cleaning chemicals.

#### ACO's Solution

- **ACO Wexel** stainless steel push-fit floor drain

#### Benefits

- Push fit floor drains come complete with O ring seals to provide a quick and watertight connection to both PVC and HDPE pipe
- The 150mm diameter floor waste offers discreet drainage of the bar

#### Other ACO products used

- Industrial stainless steel channels (ACO Stainless)
- Trafficable cable enclosures (ACO Cablemate®)
